

## RECRUITING PHD STUDENTS IN MICROBIOLOGY, IMMUNOLOGY, CANCER, AND PATHOLOGY

### WE DISCOVER

LSU Vet Med is a superior biomedical research institution with scientific experts in cancer biology, infectious disease, immunology, microbiology, pathology, and more.

The Department of Pathobiological Sciences at the LSU School of Veterinary Medicine is seeking outstanding Ph.D. students in all areas of departmental research strengths, which include bacterial pathogenesis, immunology (including cancer immunology), parasitology, pathology, pulmonary infections and lung function, and viral pathogenesis.

Successful applicants will receive a competitive stipend, full tuition waiver, and access to cutting edge resources. No GRE test is required. We encourage applicants from underrepresented

groups to apply. For more information, please consult our departmental website.

Applications to our graduate program should be submitted by January 31, 2023, through the LSU Graduate School website indicating Pathobiological Sciences as the receiving department.

Please contact Anand Ramachandran, PBS Coordinator, ([aramac5@lsu.edu](mailto:aramac5@lsu.edu)) with any questions.
